PROFESSIONAL SUMMARY

Results-driven Data Analyst with 2+ years of experience in **Data Analysis, Data Visualization, Business Intelligence, KPI Reporting, Data Modeling, Statistical Analysis, and ETL development** using Python, SQL, MySQL, Power BI, and Advanced Excel. Skilled in transforming complex datasets into actionable business insights through interactive dashboards, automated reporting solutions, and analytical storytelling. Experienced in **Stakeholder Management, Requirements Gathering**, query optimization, process automation, and delivering data-driven solutions that support strategic business decisions.

CORE COMPETENCIES

- Python (Pandas, Scikit-learn)
- SQL & MySQL
- Data Analysis
- Business Intelligence
- Data Visualization
- Advanced Excel
- ETL Pipeline Design
- Data Modeling
- KPI Reporting
- Machine Learning Algorithms
- Process Automation & Scripting
- Analytical Storytelling
- BI Visualization & Dashboards

WORK EXPERIENCE

Data Analyst - Full-time | **MaanGraphics Pvt. Ltd.** | Dec 2023 - Present | Bengaluru

- Performed **Data Analysis** on large datasets to identify business trends, measure performance, and support decision-making.
- Developed interactive Power BI dashboards for **Data Visualization, Business Intelligence, and KPI Reporting**, enabling stakeholders to monitor key business metrics.
- Created and maintained Data Models using Power BI, DAX, and MySQL to improve reporting accuracy and performance.
- Collaborated with business users through **Requirements Gathering** sessions to understand reporting needs and translate them into analytical solutions.
- Applied **Statistical Analysis** techniques to evaluate performance metrics and identify improvement opportunities.
- Managed communication with stakeholders and provided regular project updates, demonstrating strong **Stakeholder Management** skills.
- Utilized **Advanced Excel** (Pivot Tables, Power Query, Lookup Functions) for data validation, analysis, and reporting.

Junior Software Trainee | **Glovish Technologies LLP** | Apr 2023 - Sep 2023 | Bengaluru

- Designed and implemented a cloud-based Intrusion Detection System (IDS) leveraging machine learning algorithms to improve threat detection accuracy.
- Performed comprehensive data cleaning and preprocessing on raw network traffic datasets to ensure high-quality model input.
- Fine-tuned ML classification models achieving improved precision and recall scores; documented methodology and results for technical stakeholders.
- Collaborated with engineering team on system architecture design and presented findings to senior leadership.

KEY PROJECTS

Global Climate & Energy Dashboard — Power BI | Business Case Study

- Designed a 4-page interactive Power BI dashboard analyzing global climate and energy data (2020–2024) across metrics including energy consumption, CO₂ emissions, renewable share, temperature, humidity, and industrial activity by country.
- Built DAX measures (Total Energy, Total CO₂, Renewable Share, Forecast Energy, Avg Energy/CO₂ per Country) and modeled relationships to support multi-dimensional analysis.
- Applied advanced visuals — decomposition tree, key influencers, waterfall chart, treemap, and combo charts — to analyze CO₂ emissions vs. temperature, renewable share vs. temperature, and energy price vs. industrial activity.
- Delivered a forecasting view for energy consumption trends and ranked the Top 10 energy-consuming countries to support executive-level business decisions.

Netflix Content Analysis & Recommendation Engine — Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn)

- Performed end-to-end data cleaning and EDA on a Netflix catalog dataset of 8,807 titles across 12 attributes, handling missing values in director (~30%), cast, and country fields using Pandas.
- Conducted aggregation analysis to surface content trends: a 70/30 Movie-to-TV Show split, top contributing countries (US, India, UK), and leading genres (International Movies, Dramas, Comedies).
- Built visualizations with Matplotlib and Seaborn to communicate content growth (titles added peaking at ~2,000/year in 2019) and genre/country distribution patterns.
- Developed a content-based recommendation engine using Scikit-learn TF-IDF vectorization (5,000 features) and cosine similarity on show descriptions to recommend similar titles.

Notebook: colab.research.google.com/drive/1fEfVQE_zJa6NOrXG-LvxuSiFyKzBU0Wc

ETL Dashboard - End-to-End Data Pipeline & Power BI Visualization

- Performed end-to-end **Data Analysis**, cleansing, transformation, and validation using MySQL and Python.
- Designed scalable **Data Models** and developed interactive dashboards for **Business Intelligence** and **KPI Reporting**.
- Created advanced visualizations to support executive-level **Data Visualization** and performance tracking.
- Gathered business requirements from stakeholders and converted them into actionable dashboard solutions.

Mental Health Risk Prediction Model (ML)

- Applied supervised ML algorithms (Logistic Regression, Decision Trees, Random Forest) to predict self-harm risk from socioeconomic and demographic features.
- Conducted feature engineering, SMOTE-based class balancing, and model evaluation (AUC-ROC), translating statistical outputs into narrative risk reports for domain experts.

Encryption & Decryption Framework using Python (MCA Internship - SMVIT)

- Developed a secure encryption/decryption framework in Python as part of MCA IV Semester Industry Internship (20MCA43); scored 94/100 in internship assessment.

IoT-Enabled Automatic Hand Sanitizer Dispenser

- Integrated microcontrollers and proximity sensors with Wi-Fi connectivity to enable touchless operation and real-time remote monitoring via a web dashboard.

EDUCATION

Master of Computer Applications (MCA)

Sir M Visvesvaraya Institute of Technology, VTU - Bengaluru | 2021 - 2023 | CGPA: 7.2

Bachelor of Computer Applications (BCA)

Vijaya College - Bengaluru City University | 2018 - 2021 | CGPA: 7.5

Pre-University - PCMB

Bellary Independent PU College, Bellary | 2016 - 2018 | CGPA: 5.52

SSLC (10th) - KSEEB

S.G.P.T.A. High School, Bengaluru | Apr 2015 | CGPA: 6.48

CERTIFICATIONS & ACHIEVEMENTS

Certifications

- **Google Data Analytics Professional Certificate** - Google / Coursera | *Data cleaning, analysis, visualization, and storytelling with data*
- **Microsoft Power BI Data Analyst Associate (PL-300)** - Microsoft | *Dashboard design, DAX, Power Query, data modeling & publishing*
- **Python for Everybody** - Coursera / University of Michigan | *Python programming, data structures, web scraping, databases*
- **SQL for Data Science** - Coursera / Udemy | *Advanced SQL queries, joins, subqueries, aggregations & database design*
- **MCA Industry Internship Certificate** - SMVIT / VTU 2022-23 | *Encryption & Decryption Framework using Python*

Achievements

- Optimized MySQL queries at MaanGraphics, reducing dashboard load time by 30% - recognized by stakeholders for improved reporting speed.
 - Scored 94/100 in MCA Industry Internship (20MCA43) - highest performance metric in IV Semester, VTU, Oct 2023.
 - BCA - First Class with B+ Grade | Bengaluru City University, Convocation: April 2022.
 - Developed a cloud-based ML Intrusion Detection System at Glovish Technologies - contributed to reducing false-positive threat alerts.
 - Successfully delivered ETL-to-Power BI pipeline independently, enabling real-time stakeholder dashboards from scratch.
-

TECHNICAL SKILLS

Programming & Databases: Python, SQL, MySQL

Business Intelligence & Data Visualization: Power BI, DAX, Power Query, Dashboard Development, Interactive Reporting

Data Analytics: Data Analysis, Statistical Analysis, Data Cleaning, Data Transformation, Data Validation

Data Modeling & ETL: Data Modeling, ETL Pipeline Development, Data Integration, Query Optimization

Reporting & KPIs: KPI Reporting, Business Intelligence Reporting, Performance Analysis

Advanced Excel: Pivot Tables, Power Query, VLOOKUP, XLOOKUP, INDEX-MATCH, Conditional Formatting, Dashboard Reporting

Business Skills: Stakeholder Management, Requirements Gathering, Analytical Storytelling, Problem Solving

Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code, Monday.com, Microsoft Excel, Power BI
